

## The ACT Act

Wednesday, 03 March 2010

Rails-to-Trails Conservancy (RTC) builds on the successes of the Nonmotorized Transportation Pilot Program, a program initiated by Freedom and its advocacy partners, to establish the Campaign for Active Transportation (ACT).

The ACT Act would establish a fund within the Surface Transportation Program that would allow communities nationwide to draw from to improve their walking and bicycling networks.

The Act was introduced to the U.S. House of Representatives on Tuesday, March 2, 2010. Encourage your U.S. representative to support the legislation.
